About Propello

16 Years Three Essential Elements One Unwavering Standard

The Indian kitchen is more than a room; it is the engine of the family. It is where health is nurtured, traditions are kept, and daily life connects. For 16 years, Propello has focused exclusively on perfecting the appliances that power this vital space. We don't build the kitchen—we engineer its essential elements: the air you breathe, the water you drink, and the fire you cook with—and this is why we hold ourselves accountable to our fundamental promise:

“Cares for you.”

What do we mean by "Cares for you"?

For us, "Cares for you" is not just a philosophy; it is our baseline for engineering. We ask one simple question with every product: How does this improve daily life?

It means integrating touch less wave technology into our chimneys, so you never have to fumble with switches mid-recipe. It means designing purifiers that don't just filter, but actively restore vital minerals to your family's water. It means precision auto-ignition hobs that make every meal effortless and safe. We strip away the unnecessary, leaving only seamless, reliable performance.

Vayu

*"Your family cooks in the kitchen.
Your family breathes in the kitchen.
We care for the air they breathe."*

The kitchen is the lungs of your home. It breathes in the intense aroma of rich spices, the steam of simmering pots, and the vibrant energy of every meal you prepare.

Our chimneys are engineered to act as silent guardians of your cooking space. Built specifically to handle the demands of Indian cooking, they feature advanced, energy-efficient motors that deliver uncompromising high-suction power. They effortlessly and quietly pull away heavy smoke, oils, and odors before they ever have the chance to settle onto your walls or fabrics, with intelligent filtration that catches the grease while keeping the motor clean. This is more than just ventilation.

We protect the invisible air of your kitchen, ensuring the air your family breathes is always as fresh as the ingredients you cook with.

Onyx

BLDC

The newest hood we've made. Designed first as a piece of furniture, then engineered to outperform everything else.

TECHNICAL SPECIFICATIONS

i. Suction Power	1800 m3/hr
ii. Motor Wattage	130W BLDC
iii. Speed Levels	8 Speed + Turbo
iv. Air Outlet	150mm
v. Body Type	Metal & Glass

Oil Collector
FOR STAIN-FREE KITCHENS

Touch-less
GESTURE CONTROLS

Dry Auto Clean
TECHNOLOGY

Hydraulic Glass
ELEVATING YOUR KITCHEN

Size - 90 cm

Galaxy Plus

BLDC

The Galaxy, evolved. The same trusted hood, with a new BLDC motor inside — moving more air, using far less electricity, with less noise.

TECHNICAL SPECIFICATIONS

i. Suction Power	1650 m ³ /hr
ii. Motor Wattage	130W BLDC
iii. Speed Levels	8 Speed + Turbo
iv. Air Outlet	150mm
v. Body Type	Glass with SS

Inverted Filter
WITH OIL COLLECTOR

Touch-less

Jal

*"From the water that cooks your family's food.
To the water that fills their glass.
We care to give your family the best water possible."*

Water is the silent foundation of your home, from being poured into the drinking glass to being stirred into a meal, it touches every part of your family's day — demanding absolute purity.

Our purifiers are engineered to work tirelessly, ensuring that every drop of water is uncompromisingly clean.

True health isn't only about removal — it's also about what's enriched. Our purifiers not only eliminate impurities, but they also enrich your water with essential minerals that support your family's health and immunity.

Splash Alkaline

Indian water gets compromised twice over — first by pollution, then by over-purification. This one corrects both, removes impurities and gives back what was lost. 90% TDS reduction, while keeping PH levels in balance, making water just not pure — but complete

TECHNICAL SPECIFICATIONS

Agni

*"Your family's traditions live in the kitchen.
Your family's memories are made in the kitchen.
We care for the fire that brings them to life."*

Kitchen is where recipes passed down through generations meet the stories of today. A memorable meal is about more than just ingredients; it requires the right energy, precise heat, and the comfort of loved ones sharing an experience.

Our precision-engineered hobs are designed to honor that tradition while elevating your everyday cooking. Built with robust and premium materials that seamlessly integrate into your counter top, our appliances ensure safe and reliable flame — always at your command.

We don't just provide the heat to cook your food; we provide the spark that sustains the warmth of your home.

Vetro 3B

Built for the way an Indian kitchen actually cooks. A slow simmer for the dal, a roaring flame for the tadka, and the space to keep the evening chai going—three distinct flames, mastered at once.

TECHNICAL SPECIFICATIONS
